

Brian Dorton

Full Stack Developer

I specialize in developing and implementing technology solutions that drive business growth and operational efficiency. From creating a fully custom sales recommendation engine with a team of only 5 to automating data collection and building custom reporting tools, my focus is on delivering scalable, impactful results. With expertise in integrating systems like Salesforce and implementing modern tooling, I thrive in leading development initiatives that align with company objectives and foster continuous innovation.

EDUCATION

Masters Educational Management, May 1, 2010-May 1, 2012, Master of Science, University of Houston-Clear Lake

Biomedical Science, Aug 1, 1996-Dec 1, 2000, Bachelor of Science, Texas A&M University

EMPLOYMENT

Full Stack Developer, Sales Systems Architect, Nov 1, 2017, IBM

Supported a large sales team through building custom applications that streamline processes and automate the collection of data.

- *Built* sales recommendation engine launched in 2023-2H with 4800 recommendations reviewed by reps, generating \$7.8M in additional pipeline with \$1.7M closed Won.
- *Automated* data collection and created custom tools for metrics and reporting for a department responsible for for over \$50M in revenue.
- *Implemented* modern CI tooling to update and deploy applications on IBM's Cirrus Cloud network.
- *Integrated* data collected from sales reps with Salesforce data through Salesforce Api interface and building custom Salesforce Lightning applications.

Lead Campus Director, Sep 1, 2014-Oct 31, 2017, The Iron Yard

Running operations at The Iron Yard Academy's three-month intensive code schools personally focused on the Houston campus.

- *Lead* and contribute to company-wide initiatives that are aligned to The Iron Yard Mission and Vision
- *Support* and manage a region of 6 campuses
- *Support* campus level decisions ranging from student concerns to budget questions
- *Administer* performance reviews

Freelance Web Developer, Sep 1, 2011, dorton.co

Develop applications for both clients and internal applications for companies.

- *DocDel*: Developed fullstack MVP for document and rights management for entertainment law firm
- *CarRiders*: Developed application for an efficient, safer alternative to school dismissal. Currently in place at 3 campuses
- *TIYEvent Signin*: Developed an event signin app that helps you glean patterns and data from attendees of your events. Currently used nationally at The Iron Yard

Campus Administrator, Aug 1, 2011-Aug 30, 2014, Houston Independent School District

- *Disaggregate* and disseminate grade level common assessment data and district level assessment data as collected through the EdPlan system. Assist grade level teams in spotting trends using the data and designing interventions to address any gaps.
- *Ensure* campus computers/mobile devices are maintained and running. Design and deliver technology professional development sessions to staff and beginning computer classes to parents. Oversee all campus technology initiatives.

REFERENCES

Mary Bentley

I have worked with Brian for about two years now. We worked a on building and inference engine for sales automation in Salesforce. Brian was critical to the success of the project. His work ethic is second to none and his knowledge of the back end processes is remarkable. The project couldn't have happened without him.

Jessica Mitsch

Brian lights up any room he walks into. He was the founding Campus Director for The Iron Yard Houston and built an incredible community over the years that only someone with his kind of heartfelt passion, kindness and care could do. You're a lucky person if you have the privilege to work with Brian!
